To apply: <http://gradschool.cofc.edu>

Application deadlines

fall: July 1

spring: November 1

summer: April 1

For individuals interested in career advancement or a change in careers, the 30 faculty members that teach within this program can help by providing expertise in a variety of research areas including: algebra, analysis, combinatorics, dynamical systems, geometry, Lie Theory, logic, mathematical biology, mathematical physics, number theory, numerical analysis, probability, representation theory, scientific computing, statistics and topology.

This program helps to strengthen anyone's experience in applied statistics by combining a solid theoretical foundation with a variety of applied tools and techniques that will prepare you to handle statistical problems in business and industry.

Classes are offered during the summer and the evening to accommodate the schedules of working professionals. Additionally, the classes are purposely kept small to provide students with personal attention while they work closely on projects with individual faculty members.

Admission requirements

- An official transcript from each institution of higher learning attended
- Two letters of recommendation
- Statement of goals
- An undergraduate GPA of at least 3.0
- Courses in calculus, linear algebra and statistics
