

South Carolina Water Monitoring Portal – Accessible Water Quality Data for EVERYONE

The image features a central map of South Carolina densely populated with multi-colored dots representing water quality monitoring sites. To the left, a red barn icon is positioned above a vertical data storage icon labeled "DATA DATA DATA". A large orange arrow curves from the data storage icon towards the central map. Below the barn, a cartoon character in a tan shirt and blue pants is shown walking, leaving a trail of black footprints that lead towards the central map. Surrounding the central map are six inset panels, each displaying a zoomed-in map of a specific region with associated filter controls:

- HUC 12 FILTER:** Includes a dropdown menu for "HUC 12" and a text input field containing "030501030402 Burgis Creek-Catawbe River".
- TIME FILTER:** Features a horizontal timeline slider with the text "2000 to 2022".
- COUNTY FILTER:** Includes a dropdown menu for "County" and a text input field containing "Horry".
- ORGANIZATION FILTER:** Shows a checked checkbox for "USGS" and a red dot legend.
- HUC 10 FILTER:** Includes a dropdown menu for "HUC 10" and a text input field containing "0305020707 Combahee River".
- PARAMETER FILTER:** Includes a dropdown menu for "Water Quality Parameter" and a text input field containing "Mercury".
